CONCEPT & COMPACT

POWER AND PRECISION FOR INDUSTRIAL MILLING

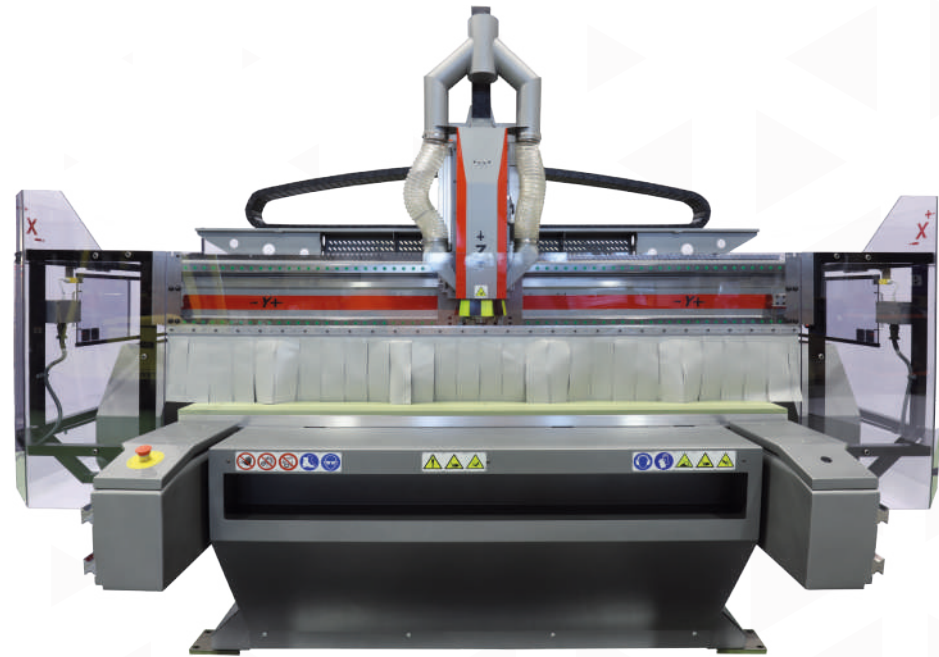

PROTEK.IT

ENG

CONCEPT

Accuracy and precision at its best, designed for aluminium and titanium, it is the perfect solutions for precision industry.

A Machine with an high stability structure and with a transmission that guarantees machining with high precision and finishing.

Easy toolpath generation using customized CAD / CAM software.

Electrospindle: 30 kW - 24,000rpm

Precision: <0.01

Control: Mitsubishi CNC M800

Blocking System with automatic partition with vacuum technology

Tool Changer: Automatic up to 100 positions

Lubrication: Minimum external and internal tool system with programmable intermittence

Width: Up to 2,550 mm

Lenght: Up to 12,300 mm

Applications: Industrial | Mechanical | Aerospace and Aeronautical | Automotive | Nautical | Rail Transport

COMPACT

Precise and powerful, designed for the heaviest industrial applications in aluminium, plastics and composites industry.

A machine with a solid structure and a transmission designed to work at high speeds with excellent finishing.

Easy toolpath generation using customized CAD / CAM software.

Electrospindle: 19 kW - 24,000rpm

Precision: ± 0.015

Control: Mitsubishi CNC M800

Blocking System with automatic partition with vacuum technology

Tool Changer: Automatic up to 60 positions

Lubrication: Minimum external or internal tool system with programmable intermittence

Width: Up to 2,550 mm

Lenght: Up to 10,250 mm

Applications: Industrial | Mechanical | Aerospace and Aeronautical | Automotive | Nautical | Rail Transport
